- OVERVIEW
- AI TOOLS PERFORMANCE
- INDUSTRY & USER SEGMENTS
- KEY INSIGHTS

KEY INSIGHT – COUNTRY ADOPTION

1. **Highest adoption:** Germany leads the displayed countries at approximately 57.19%.
2. **Lowest adoption:** The USA has the lowest displayed rate at approximately 56.53%.
3. **Small variation:** Adoption rates are closely grouped, showing relatively consistent adoption across the displayed

KEY INSIGHT – AI TOOL PERFORMANCE

- **Claude** is identified as the top-performing AI tool on the dashboard.
- **Stable Diffusion** is identified as the lowest-performing AI tool.
- The highest tool adoption rate displayed is **57.28%**.
- **Chat GPT** is identified as the most-used AI tool based on the dashboard's measure.
- AI tools differ in adoption and usage, indicating varying levels of popularity among users.
- Comparing adoption rates with active-user counts helps identify whether popular tools also have strong adoption.
- Tool performance comparisons can help organizations make informed decisions about which AI tools to prioritize.

KEY INSIGHT-INDUSTRY ADOPTION

- Agriculture shows the highest displayed industry adoption rate at **57.39%**.
- Enterprise shows the lowest displayed industry adoption rate at **56.95%**.
- The difference between these rates is approximately **0.44 percentage points**, indicating relatively small variation across industries.
- Technology, Healthcare, Manufacturing, Finance, Education, Transportation, and Retail also show different adoption levels.

KEY INSIGHT – AGE GROUP ANALYSIS

- The donut chart compares AI adoption across five age groups: 18–24, 25–34, 35–44, 45–54, and 55+.
- The displayed adoption rates are close to one another, ranging from approximately **56.73% to 57.09%**.
- The 35–44 age group has the highest displayed rate at approximately **57.09%**.
- The 55+ age group has the lowest displayed rate at approximately **56.73%**.
